- Compatible with MAC and PC
- Remote internet monitoring (up to 5 users at the same time)

As bold as you want to be! Master the 8-channel DVR+Camera bundle that will become your eyes and ears while you're asleep and while you're away. The QS558-493-1 is a premium 8-channel surveillance system with pre-installed A/V rated 1TB hard drive, 3 premium color cameras, 1 Pan-tilt premium camera, and plenty of alarm and audio inputs to maximize your security.

The QS558 premium DVR with 8-channels gives you an extra set of eyes to guard over your property or assets in high resolution. This DVR provides you with real-time D1 resolution, the highest resolution available to DVRs! At 240 FPS (30 FPS Per Channel), recorded video will appear smooth and fluid. D1 gives you 4-times the image size, detail and clarity of conventional CIF quality. Its larger image and added detail makes it easier for you to identify people and objects.

Gain unmatched situational awareness with the QD6505P Pan-tilt camera. With programmable cruise patterns, this versatile camera has your property covered at every angle. It delivers high-quality images at 650 TV Lines of resolution in daylight and low-light situations as low as 0 lux, while also incorporating automatic focus. It's full 360° horizontal scan movement and its 90° tilt movement makes sure you capture the essential details. Easily control the camera using the buttons on the front

panel of your DVR, through the on-screen control interface or with an included remote control. The included wall-mounting brackets provides added flexibility in positioning the camera to achieve the best viewing angle - from on a horizontal, vertical or overhead surface.

Expect clear and crisp images with captured activity. The QM6008B is a high-resolution, premium camera with 600 TV lines of resolution, 100 feet (30m) of night vision, and 36 infrared LEDs. The three included cameras have an anti-glare feature, with dual-filter day & night auto switching. The QM6008B is ready-made with a pre-assembled, 3-axis mount for easy placement on a wall, ceiling, or other flat surface. This smart design helps to deter vandalism with cables that route directly through the bracket. Because of their 0 lux luminance, the potent night vision you need can be achieved in low to zero light. Standard 60 foot cables are included with each camera for immediate installation.

Q-See DVR+Camera bundles are a winning combination for your surveillance solution. Merging high-performance video with high-quality cameras, Q-See DVR+Camera bundles achieve excellence in home or business environments. The DVR's user interface is simple to use and the included mouse and remote control make menu navigation stress-free. Rely on Q-See to save you money, time, and peace of mind with competitive prices, strong warranties, easy installation, and lifetime technical support.

KEY FEATURES:

Recording Resolution
The QS558 Surveillance DVR provides you with real-time D1 resolution, the highest resolution available to DVRs! At 240 FPS (30 FPS Per Channel), recorded video will appear smooth and fluid. D1 gives you 4-times the image size, detail and clarity of conventional CIF quality. It's larger image and added detail makes it easier for you to identify people and objects.

Hard Drive
This system can support 1 A/V Rated SATA HDD of up to 2 TB. To ensure you can begin monitoring your home right away, the DVR comes with a pre-installed 1TB hard drive! The amount of footage that you can save on the hard drive before needing to over-write footage will depend on the size of the hard drive, recording and resolution settings you select during setup.

Remote Monitoring
Remotely monitor and manage your home or office 24/7 from anywhere around the world via the internet using a Windows PC, Mac, or a supported 3G/4G Smartphone, including iPhone™/iPad™ and Android. Enjoy additional peace of mind by receiving instant email alerts with snapshot images when motion is detected, when the hard drive is full, or when and if video loss has occurred. Up to 5 users can remotely

log into the DVR at the same time and the system's dual-stream technology allows for easier internet access at lower bandwidths.

DVR FEATURES:

H.264 COMPRESSION
H.264 Compression minimizes file size in order to maximize the hard drive's recording time, as well as transfer video for viewing over the internet.

MULTI-TASKING FUNCTIONALITY
The multi-tasking feature allows multiple functions to occur on the system at one time: record video, watch live video or playback video, while also monitoring and managing the system remotely, and also backing up files.

DISPLAY RESOLUTION
When watching video live, the display resolution is 704x480. When playing back previously recorded video, the resolution will depend on the recording settings selected during setup (see CIF/D1 recording resolution for more information).

HDMI Connection
Connect to any HD TV or Monitor via the HDMI port for high resolution viewing options.

VGA CONNECTION
Connect a VGA monitor to the Video Out Port to serve as a large display or allow viewing in another room.

THREE VIEWING MODES

Select from 3 different viewing modes:

- Single Cam: Display 1 camera at a time.
- Cam: Display 4 or 8 cameras at once on a split screen
- Timed Auto-Sequence: Display a timed-auto sequence, which shows each camera for a few seconds and rotates the view through all cameras one at a time.

CONVENIENT BACKUP
Backup video files from the surveillance system to a PC, Flash Drive or USB Hard Drive in order to free-up space for new video while retaining important footage.

FOUR RECORDING MODES

Select from 4 different recording modes:

- Advanced Motion Detection: Advanced motion detection settings help to minimize false alarms. The easy-to-use motion detection set-up screen allows you to mask out certain areas which frequently experience heavy movement in order to avoid false alarms and unnecessary triggers.
- Time-Schedule: Record based on a pre-set schedule that you choose depending on your needs. For example, only at night, only during office hours or only during non-business hours.
- Alarm Sensor Trigger: Only records when the alarm sensor has been triggered. (Alarm sensor not included.)
- Manual: When set to manual, the system can be turned on to record 24 hours a day, 7 days a week or until you manually turn it off.

CAMERA FEATURES:

100 Ft of NIGHT VISION
The cameras are each equipped with 36 infrared LED lights that can record at a distance of up to 100 feet in the dark

600 TV Line, CMOS HIGH-RESOLUTION
